## Add new claim 16:

BZ

16. The process as claimed in claim 12, wherein the polyolefin molding composition produced has a molecular weight distribution  $M_w/M_n$  that is  $\leq 3$ .

## **REMARKS**

## A. Amendments to the Claims

Claim 6, now canceled, has been incorporated into amended claim 12. The dependency of claims 7, 8 and 15 has been changed from canceled claim 6 to claim 12. New claim 16 recites a particular embodiment wherein the polyolefin molding composition has a molecular weight distribution  $M_w/M_n$  that is  $\leq 3$ . Support for new claim 16 is found in Examples 6–16. In these examples, a polyolefin molding composition is prepared in accordance with the process of claim 12 and the reported  $M_w/M_n$  are as follows:

Example	6	7	8	9	10	11	12	13	14	15	16
M <sub>w</sub> /M <sub>n</sub>	2.2	2.8	3.3	2.0	2.3	2.5	2.7	2.9	3.3	2.9	2.5
